HE'S MORE THAN JUST A TEACHER

From his teaching we have erudited
From his knowledge we have unfurled
An intellect of our language
And cultures of the "German's World."

His ways would enlighten our day;
He'd make us laugh and smile inside
He'd share with us a pun or two,
Often times there was quite a few.

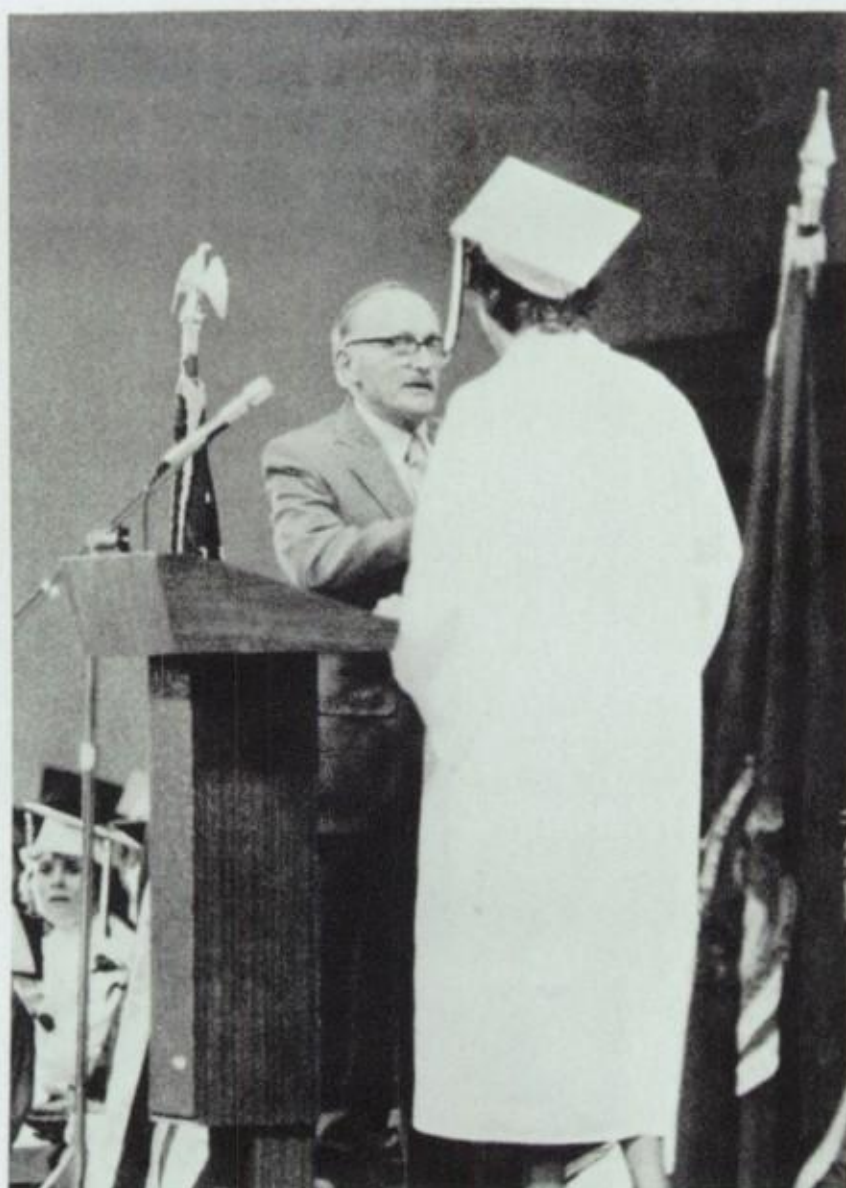

In private, he would talk to us on
Courses that he wasn't teaching and
Advise us on personal matters.
Think first was his motto-we'd try to follow.

We'll hold the memories close to us
of the treasured times we've shared with you
Because you're more than just a teacher
You're a close friend to all of us, too.

PROM POEM

ALMOST PARADISE

To the seniors from the juniors
we hope you will come alive,
and share in our excitement
during the prom of eighty-five.

Almost paradise is our theme
it fits us all so well,
for what lies in our future and our dreams
only time will tell.

Everyone looks so happy
and done up to a tee,
sharing thoughts and laughter
it looks like paradise to be.

A prom is a time of happiness
we all shall gather to share,
remembering the fun at C.H.S.
and learning how to care.

This will be our last year
to reminisce about the past,
the time has gone away
and has traveled very fast.

We will miss you seniors
and hold your memory dear,
as we get ready and prepare
for our last remaining year.

Someday we will all look back
at the times that came alive,
and we will remember that we were a part
of the prom of nineteen-eighty-five.

THE DOW CHEMICAL COMPANY'S 21st Century Challenge

These Tri-City Area students worked in research, computers and secretarial services during the 1984-85 school year.

CO-OP students prepare for the challenges of the 21st century by combining classwork with industrial work. Dow is preparing by building new plants to manufacture new health, consumer and agricultural products.

The Michigan Division of The Dow Chemical Company is approaching its second century of manufacturing.

To meet the challenges of change during the second hundred years we are working today to develop new products and technologies. The goal is to make as many significant contributions to the quality of life during the second century as we did in the first with our plastics, agricultural, consumer and pharmaceutical

products.

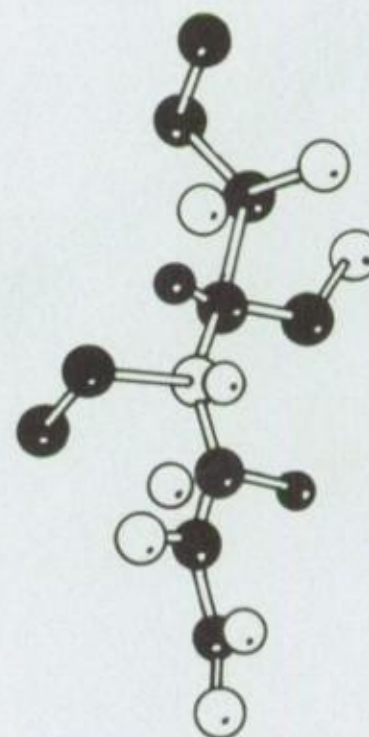

These new innovations will require imaginative research, dedication and an unwavering commitment to quality... employee characteristics that we see in the high school CO-OPS that work with us throughout the school year.

Our challenge is to find more good people like these students who will join us in our search for the products of tomorrow... by starting today.

Challenged? Look Us Up
